#### BIOL 1114 Introductory Biology - Fall 2014 Sections 701- 704

Instructor: Dr. Donald P. French My Office: 207 LSW (to meet)

**Dept. Office:** 501 LSW (for mail) **Phone:** 4-9690

Office Hours: almost anytime by appointment – email or ask after class Email: dfrench@okstate.edu

NATURE OF THE COURSE: This course introduces students to the integration between structure and function among all levels of biological organization. Students will learn to apply principles of evolution, genetics, physiology and ecology to understanding the integrated and interdependent nature of living systems through discussions that emphasize the process of science. Observation and investigation are emphasized in both lecture and lab.

OBJECTIVES: We want you to learn and be able to apply certain basic biological **concepts** and research **skills**. These are listed in a

 $knowledge\ checklist\ that\ you\ can\ find\ on\ our\ website\ (\underline{http://biol1114.okstate.edu}).\ \ You\ can\ use\ this\ very\ detailed$ 

list as a study guide to help you keep track of what you need to know.

REQUIRED TEXTS: Hoefnagels, M., 2014. Biology: Concepts and Investigations. 3<sup>rd</sup> edition. McGraw-Hill: NY. See

http://biol1114.okstate.edu/ebook.html for an explanation about the versions of the book.

French, D. 2014. Investigating Biology: A Laboratory Resource Manual. 2014 edition Fountainhead

Press: Fort Worth.

Pechenik, J.A. 2012. A Short Guide to Writing about Biology. 8th Edition. Pearson Longman

Publishers:NY

1 pkg. 5x8" index cards, one side lined

Turning Technology Clicker; ResponseCard NXT (ISBN: 978-1-934931-45-5).

ATTENDANCE: You are expected to attend both lab and lecture. Arrive on time and stay for the entire period. See policies under grading or in lab syllabus for "make up" policy. In the event of University cancelation – check <a href="http://biol1114.okstate.edu">http://biol1114.okstate.edu</a> for instructions regarding lab.

**EXAMS:** 

Four exams are scheduled: Three (3) before final exam week and one (1) during finals week. **The dates and locations are noted on the attached schedule**. We are very concerned about students who due to circumstances miss an exam. Students who miss an exam are typically under stress (e.g., personal or family tragedy, unavoidable personal obligation); therefore we developed a policy to avoid creating a more stressful situation for students. **Please see our policy under Grading (below).** 

All exams cover both theory and lab experiences and are cumulative; e.g., questions on exam 3 will test material covered before exam 1 and 2. Exam questions typically require interpretation of data and application of concepts rather than rote memory. While emphasis will be placed on material specifically discussed in lecture, exams will also include questions covering other assigned materials and readings. Read all questions and answers *carefully* before choosing the single BEST response for each question. Feel free to ask the instructors present for clarification.

All exams are "in common," i.e., everyone taking this course this semester, regardless of instructor, takes the same exam at the same date and time as listed for each exam, but in a different room. Exams are usually NOT scheduled for the room where you attend lecture/theory. Be sure you know when and where to take your exams. Check your syllabus early, if you have a conflict with another common exam, let me know ASAP.

You must bring a NCS Answer Sheet (Available in the bookstore), a #2 lead pencil, and your student ID to each exam.

To get credit, you must fill out the information on your answer sheet correctly - Put your **O-Key Account Username** in the boxes indicated **for LAST NAME** and darken the appropriate circles. **Write your Name**(**Last, First**) in the space above the boxes containing your O-Key Account Username. To indicate the form of the exam you are taking ("Star or Nostar" as marked on your test form), **write S or N in the last column of the name boxes and darken the appropriate circle**. Enter the number **143n** (where n = 1, 2, 3, or 4) and **darken the corresponding circles** in the **first 4 columns** of the "**Student ID.**" Do NOT enter other information. Failure to perform this correctly will incur a **-10pt handling fee**.

GRADEBOOK: We use Desire2Learn (D2L) as an electronic gradebook. All grades will be entered and visible there. Lab grades will be posted approximately one week after assignments are returned to you in lab. You have 7 days from the release of **any** grade to report a grade discrepancy to the appropriate instructor or it may not be changed.

DROP POLICY: See Catalog Registration & Records Section and dates on schedule.

ACADEMIC INTEGRITY: Read details on page 3 below – it is really important that you do!

SPECIAL NEEDS: If you have a documented disability and need special accommodations of any nature, I will work with you and the Office of Student Disability Services, 315 Student Union, to provide reasonable accommodations so that you have a fair opportunity to perform successfully in this class. Please let me know about any necessary accommodations by the end of the second week of class. If you have health related issues that may interfere with participation in certain labs (see materials list on Lab study guides page [http://biol1114.okstate.edu/study\_guides/labs/index.html]), you must provide documentation to your TA from the Office of Student Disabilities Services no later than 14 days prior to that week's Investigation OR use your Disaster Insurance to cover the missed lab.

LECTURE/THEORY: This is a FLIPPED CLASSROOM. Each segment of the course is structured around one or more scenarios - case studies or vignettes that can be interpreted or solved by applying selected biological concepts. The lectures are videos (on-line) and the Theory meetings will combine discussions, individual and group activities, and demonstrations to give you the opportunity to DISCUSS, REVIEW and PRACTICE APPLYING biological concepts in as active a manner as possible. You will have the opportunity to accumulate up to 60 points toward your final semester grade from individual or group activities. There are no "make ups" for specific assignments (see Grading below). You may not earn credit for these if you are absent, do not turn in an assignment when it is collected, do not sign your own name on the assignment, do not put your group number on the assignment, do not have the assignment in the requested format, or do not bring your clicker (with working batteries) to class. It is your responsibility to insure that these are done correctly. Honors students have said they prefer NOT to have these graded, so see "Reflections" below.

LAB: This portion of the course offers the opportunity for students to explore and apply concepts to answer research questions. Success in the laboratory involves teamwork in designing and conducting experiments and report writing. While you will be given the entire lab period to complete your experiments and manuscripts, you are not required to remain in lab after you turn in your manuscript. Additional details about lab are in the lab syllabus.

COURSE GROUPS: While taking exams is an individual activity, almost all other activities will involve your participation with other class members in a group. Permanent groups will be formed in the first week. Groups will produce lab reports AND complete their lecture exercises collaboratively. **Peer evaluation** will affect your lab grade – See your lab manual for further information.

WWW SITE: A variety of materials are available on our website – <a href="http://biol1114.okstate.edu">http://biol1114.okstate.edu</a>. These include exams from past semesters, study guides, flow charts, outlines, note-taking aids, a knowledge checklist, tutorials and pre-lab exercises. You will find the reading assignments for each scenario (lecture topics), lab study guides, and the computer-based pre-lab assignments here. You will need your O-Key Account Username and Prism password. You will need to download webplayers for certain items to run. For help with the website email: <a href="mailto:zool-tech@okstate.edu">zool-tech@okstate.edu</a> or visit the BIOL 1114 technical support office located in the LSW 213.

LEARNING RESOURCES CENTER: Room 303 in LSW is staffed by the teaching assistants for the course and is open throughout the week (See the schedule on our website). Various materials there will help you understand lecture and lab – including **all pre-lab materials**. The instructor on duty will be happy to help you prepare planning forms or study for the tests. For help you can also email: <a href="mailto:biol1114@okstate.edu">biol1114@okstate.edu</a>. Students who go there do better in this class!

HONORS REFLECTIONS: To earn the equivalent of the 60 pts for in-class exercises, you will complete 12 reflections.

The first will be due after the first class, the next 10 - the class period after each scenario ends, the last – by the final.

Format: Each reflection, which is to be placed in the appropriate D2L drop box, will consist of the following paragraphs:

- 1) **Description of the scenarios** as viewed in the videos along **with the concepts you learned** from them: What was the story, question/problem, solution, related concepts, etc.? **This will help you review**.
- 2) Your assessment of what you have learned what do you think are the strengths/weaknesses in your knowledge and skills?

   This will help you determine what you need to study.
- 3) What did you do outside class to learn how much time spent viewing videos, reading, practice tests, rehearsing, tutor, meet others, use other websites, i.e. whatever you did. This will help you gauge your effort.
- 4) Your opinion of the class so far. This will help assess what does/does not work.
- 5) Your suggestions what should we change (include any modifications to your previous suggestions if you rethink them) This will help in fine tuning.

The first reflection will ONLY consist of paragraph 4, the last will have a special format provided in D2L.

ACADEMIC INTEGRITY: Be sure that you have read and understand this policy as the penalties for violations of Academic Integrity can be very serious. We follow the OSU policies on Academic Integrity (http://academicintegrity.okstate.edu/) and the Cheating & Plagiarism section (pp.G4 – G7) of your lab manual (French, D. 2014. Investigating Biology: A Laboratory Resource Manual 2014 Edition). A "first" offense (in this course or any other course during your time at OSU) will result in either a Level 1 (a "0" for the assignment) or Level 2 (an "F!" for the course) sanction as described in the OSU Academic Integrity Policy. A second violation (in this course or any other course during your time at OSU) may be upgraded to the next sanction level. Any violations beyond a Level 2 sanction (F!) can result in suspension. ALL violations and sanctions become a part of a permanent record! In addition to the policies described in the above sources, some examples of violations of Academic Integrity more specific to this course include, but are not limited to, the following: In addition to the policies described in the above sources, some examples of violations of Academic Integrity more specific to this course include, but are not limited to, the following:

- Falsifying authorship earns an F!, i.e. including as an author a student who did not adequately contribute to the production of a manuscript submitted for credit OR failing to include an author who did, is considered <u>unauthorized collaboration and cheating</u> by all affected individuals. All authors who miss a lab must have their contributions explained truthfully on the authorship form.
- Plagiarizing on final manuscripts for which you have received a prior warning results in an F!
- You may not use, as part of your groups' report, any part of a lab report not produced by your group in the <u>current semester</u>. This is considered <u>unauthorized collaboration and plagiarism</u>.
- <u>Possessing</u> lab materials (including lab manuals, lab reports, planning forms, pre-lab exercise answers) from prior semesters or from other students or the use of photocopied planning forms is considered **unauthorized collaboration.**
- Using information exclusively found in prior editions of the laboratory manual is unacceptable. If such materials appear in a lab report or planning form, it will be considered **unauthorized collaboration.**
- Submitting in-class exercises with the names of members not present in class is considered <u>cheating</u> by <u>all group members</u> whose names appear on the exercise. Each member of a group must write his/her own name on materials submitted by the group.
- Possessing a student response pad ("clicker") other than the one assigned to you is considered <u>unauthorized collaboration and cheating</u>.
- Misidentifying the exam version (star or no star) by indicating the incorrect version on the form or placing it in the alternate group for grading is considered **cheating**.
- Possessing a form of the exam during the examination period that is inconsistent with the assigned distribution of exams as indicated during the examination period is considered **unauthorized collaboration and cheating** by all affected individuals.
- Access to any electronic devices (for example cell phone, PDA, calculator, portable multimedia devices such as an ipod, electronic dictionaries) during an exam without explicit prior permission is considered <u>cheating.</u> All such devices must be turned off and out of sight or reach.
- Students who take a conflict exam may not possess a list of their answers, have copies of their exams, or communicate any information about the exam to other students, until after the normally scheduled exam is completed. To do so is considered unauthorized collaboration and cheating.

Cowboy Values: \*\*Honesty \*\*Respect \*\*Fairness \*\*Responsibility

### Lecture Schedule (for Lab Schedule, See Lab Syllabus)

Date	Week	Scenario (for readings see http://bioweb-cfs.cas.okstate.edu/info/requiredreadings)		
Aug 18	1	1. Psychics and Scientists: A series of short scenarios will center on measurement of psychic phenomena, a faculty		
		research question, a breath holding experiment, analysis of class score data, and what is a theory?		
Aug 25	M	Last day to add and last day to drop with no grade		
Aug 25	2	2. Surviving Fire and Ice: The scenario focuses on surviving in desert and tundra and adaptations for thermoregulation and water retention.		
Sept 1	M	University Holiday (Labor Day) – No Class		
Sept 2	3	3. Out of the Rain Forest: An aboriginal fishing expedition in the rain forest is explored in terms of the action of a toxi produced by plants. Pesticides, coevolution, cell membrane function and cell respiration will be discussed.		
Sept 8	4	Out of the Rain Forest continued.		
Sept. 15	M	EXAM #1 at 5:30 pm in 103 LSW Topics for exams will be those from Scenarios 1-3		
Sept 15	5	4. Chemical Defenses: A Nigerian child eats a poisonous bean, which requires extraordinary treatment by the local physician, framing investigation of cell membrane structure, secretion, intercellular communication, and neurons.		
Sept 22	6	5. Marooned in the Galapagos: This trip raises questions about what makes a species or organism successful. Attention to the physical character of these desert islands and animals living there highlights natural selection in action.		
Sept 29	7	6. Rainbow Connection: A scuba diving botanist is sent by the Smithsonian to collect algae. Blood is spilled and the biological uses of colored light, including photosynthesis, are explored.		
Oct 6	8	Rainbow Connection - continued.		
Oct 13	M	EXAM #2 at 5:30 pm. in 103 LSW- Topics for exams will be those from Scenarios 1-6		
Oct 13	9	7. Emerging Diseases: On the Amazon we meet the Yanomami amidst a breaking TB epidemic, raising the roles of symbiosis, population dynamics and evolution in development of epidemics.		
Oct 20	10	Emerging Diseases continued		
Oct 24	F	University Holiday (Fall Break) – No Class		
Oct 27	11	8. Family Reunion: A family reunion opens the door to talk about cancer, DNA, protein synthesis, genetically determined diseases and biotechnology.		
Nov 3	12	Family Reunion continued		
Nov 7	F	Last day to drop with automatic W		
Nov 10	13	9. Hogs & Chickens: Statistics about concentrated animal feeding operations raise questions about nutrients in biogeochemical cycles, the effects of livestock and people on aquatic systems.		
Nov 17	M	EXAM #3 at 5:30 pm in 103 LSW- Topics for exams will be those from Scenarios 1-8		
Nov 17	14	Hogs & Chickens Continued		
Nov 24	15	10. Why We Care about Fat: our contemporary preoccupation with fat sets the scene for a discussion of fat metabolism,		
		its genetic, nervous and hormonal control, and behavioral implications.		
Nov 26-28	W-F	University Holiday (Thanksgiving Break) – No Class		
Dec 1	16	Why We Care about Fat continued.		
Dec 9	Т	FINAL EXAM at 12:00 – 1:50 pm in 103 LSW NOTE SPECIAL TIME Topics for exams will be those from All Scenarios		

GRADING: 5

Component	Format	<b>Available Points</b>	<b>Maximum Points allowed</b>	Notes
Lecture	quizzes/ homework	-	60	These points are replaced by
Activities				Honors Reflections
Exam 1	40 2-pt. questions	80	80	All exams are cumulative;
				Each tests over ALL
				material covered previously.
Exam 2	40 3-pt. questions	120	120	
Exam 3	40 3-pt. questions	120	120	
Final Exam	70 3-pt. questions	210	210	
Lecture	Subtotal:	About 600	590	Can only earn 590 points in
				the lecture portion
Planning	Required to	Must be turned in by 5:00		
form				pm the day before lab.
Lab Reports	100-pt report every	400	400	Must be turned in BEFORE
	three weeks			you leave lab
Lab Final	Last week of lab	50 points	50 points	This serves as "disaster
				insurance" against absences
				and undesirable
				performances.
Lab	Subtotal:	450	410	Can only earn 410 points in
				the lab portion
	TOTAL:	1050	1,000	

<sup>\*</sup> Note: Lab grades are adjusted by peer evaluations; please see your lab manual and lab syllabus for details.

What do you do if you miss an exam? If for ANY reason you miss any of the first three exams, and notify me within a week, the final exam will be used to determine a substitute grade for the missed exam. If for ANY reason you (will) miss the final exam and notify me no later than 24 hours after the exam, the grade of "I" will be assigned if you are passing the course at that point. You may remove the "I" by taking the final exam for BIOL 1114 in one of the 2 following semesters, i.e., in summer or fall 2014. If you miss the final exam and do not notify me, you will be assigned a "0" for the final exam grade. Exceptions for the final exam will require approval of the Dean of Arts & Sciences.

#### What do you do if you miss an in-class exercise or homework assignment?

Specific exercises or assignments cannot be made up or submitted late. However, there will be, 65-70 points offered, although only 60 pts will be used in calculating your grade. This way you can accumulate points even if you have to miss one of these for ANY reason. Use every opportunity early and throughout the semester to complete these activities to be sure that you will have 60 pts. by the end of the semester. See Reflection Handout.

What do you do if you miss a lab? See lab syllabus. In the event of University cancelation – check <a href="http://biol1114.okstate.edu">http://biol1114.okstate.edu</a> for instructions regarding lab.

### **Grading Scale**

A	90 to 100%	900 to 1000 pts
В	80 to 89.9%	800 to 899
C	70 to 79.9%	700 to 799
D	60 to 69.9%	600 to 699
F	< 60%	0 to 599

Common Themes 6

The emphasis in this course is on your seeing biological principles in a context so that you can learn to apply the concepts in a novel situation. There are several common themes, threads or principles that we feel are important enough to repeat in various contexts. These include:

- I. "Scientific Method" or your ability to state a hypothesis, design an experiment and interpret data.
- II. **Surface-to-Volume ratio**. This ratio is fine tuned by natural or artificial selection so that an optimum ratio is achieved that maximizes or minimizes (as needed) the rate at which some material is gained or lost.
- III. **Gradients** Living things create or respond to these differences in concentration or amount of a substance over some area. You need to know how gradients are created in certain instances and/or what occurs when the gradient is present or absent.
- IV. Laws of Thermodynamics. You need to know the rules that apply to energy and its transfer. You need to know what phenomena these laws help explain and how they help shape our understanding of how chemical reactions can be related.
- V. **Protein structure and function and their use in membranes**. You need to know what effect changing a protein's shape has on the protein and what controls change. You need to know what functions proteins serve when they are positioned in membranes and how these functions are achieved.
- VI. **Natural Selection.** You need to understand how this process leads to all of the adaptations we talk about. You need to understand its action and result in every scenario. You need to know fitness is involved. You need to understand and identify trade-offs in the costs and benefits that exist in every adaptation, structure or function.
- VII. **Homeostasis** The tendency to maintain a constant internal environment between limits or to return things to normal dictates what living systems do. You need to recognize where that happens in our investigations.
- VIII. **Metabolism** Chemical and energy transformations appear in several scenarios and are an essential characteristic of all living things. You need to know where and when this is applied and discussed. You need to understand the metabolic processes we discuss.
- IX. **Inputs and Outputs**. This is not a principle, but it is a recurring theme in our discussions. You need to know what is the result or product of some certain processes or reactions. You need to know what are the starting ingredients or conditions or reactants when a process or reaction occurs. We frequently will ask you to explain or list these.
- X. **Interfering with the System**. This too is a recurring theme in our discussions what would happen if some system or process were broken or blocked? What would not happen?

This list may or may not help you in studying; we think it should and hope it does. It is not meant to be all inclusive or tremendously detailed. There may be themes you will see that we have not listed. You should however recognize the items discussed and understand how they provide answers to the types of questions we ask.

We hope you will enjoy working through the different scenarios and that you will learn from doing so. We wish you the best of luck in this course. Don't hesitate to call on any of us for help.

-The BIOL 1114 Faculty

# **BIOL 1114**

# **Student Information Sheet**

**Fall 2014** 

You are required to sign and return this sheet to me.

NA	AME (PRINT)	Group Number:		
	acknowledge that I have received and am responsible for the material in the e class policies, including those in the BIOL 1114 specific <u>Academic Integrit</u>			
NA	AME (SIGNATURE)	Please check EACH box below:		
	In this flipped classroom, I must view all lecture videos and complete text read	lings BEFORE relevant class meetings.		
	I must be prepared to work with my group, which means participate with my g participate, evaluate my group members fairly, and accept their evaluations of			
	I may not use, as an uncited, unparaphrased part of my groups' report, any part group in the <u>current semester</u> . This is considered <u>unauthorized collaboration</u>			
	I must not falsify authorship, i.e. include as an author a student who did not adequately contribute to the production of a manuscript submitted for credit OR failing to include an author who did, is considered unauthorized collaboration and cheating by all affected individuals. All authors who miss a lab must have their contributions explained truthfully on the authorship form.			
	I will not submit Identically written (or highly similar) answers (e.g. identical leading, although some similarity will be acceptable if it is clear to the Teach work is representative of each individual student.			
	<b>To avoid</b> the violation of <u>unauthorized collaboration</u> with <u>currently</u> enrolled st the name and section number of my collaborators on my planning form	udents on planning forms, I must write
